HELLA offers a comprehensive performance portfolio in the construction machinery sector that includes high-quality lighting products sophisticated electrical and electronic system solutions. This includes vehicle lighting in the form of work lights, front and rear lighting, beacons and interior lighting, as well as sensors, actuators, additional, highly functional components and complex complete solutions in the electrical/electronics system sector. The quality and performance of all HELLA products are carefully optimized to the specific requirements of the construction machinery sector.

HELLA is familiar with the needs of the construction industry and offers the right solutions. For more information visit:
